EDUCATION

University of California, San Diego

La Jolla, CA

B.S. in Data Science and B.A. in Economics — Junior Standing

Expected Graduation: June 2028

- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Principles of Data Science, Programming for Data Science, Linear Algebra

EXPERIENCE

Data Analytics Intern – Commonpoint Queens (Remote)

Fall 2026

Tech Developer Intern – SEO (Sponsors for Educational Opportunity) (Remote)

May 2026 – Present

- Selected for competitive **full-stack engineering program** with 35-40 hours/week of synchronous SWE training, 1:1 engineering manager coaching, and partner company placement

Software Engineer – AISC @ UCSD (La Jolla, CA)

Apr 2026 – Present

- Develop and maintain the AISC website serving **250+ members** using **Next.js, React, and CSS** on Netlify, reduced load times by **20%** via ISR caching to improve access to events and resources
- Built a password-protected admin portal using Supabase Auth to improve content accessibility for non-technical leads

Undergraduate Researcher – Economics Research Lab @ UCSD (La Jolla, CA)

Mar 2026 – June 2026

- Curated and preprocessed **2,000+ satellite images** for Indonesia using **QGIS, Python, and GeoPandas**, integrating road networks, population density, and administrative boundaries to train settlement classification models
- Trained a **Random Forest classifier** achieving **0.982 ROC-AUC, 0.92 F1, 96.6% recall**, and **87.8% precision** on informal settlement detection using **Scikit-Learn** across 239 balanced test samples

LEADERSHIP & VOLUNTEERING

VP Project Operations – DataWorks @ UCSD (La Jolla, CA)

Mar 2026 – Present

- Lead a **10-person** consulting team building a receipt scanning app with **LLM-powered** extraction and analytics
- Architecting pipeline from camera capture to Supabase storage to client-facing **Next.js** dashboard for the client

Campaign Lead – CALPIRG Students – UC San Diego Chapter (La Jolla, CA)

Dec 2024 – Jan 2026

- Logged **200+ volunteer hours**; trained 6 volunteers on outreach and data collection, built Excel dashboards and pivot tables to present campaign metrics and drive resource allocation decisions

PROJECTS

Rewind. | 1st place SDx Hackathon | Python, Next.js, React, TypeScript, Tailwind CSS, Omnara API

- Engineered a fork pipeline that paginates full message history, truncates at the user's chosen point, remaps schemas for Omnara's import endpoint, and launches a fresh agent resuming with the user's correction
- Built a TypeScript live-update system polling every 5s with incremental cursors and deduplication, auto-terminating on agent completion
- Shipped a typed Omnara API client for 6 endpoints with a regex-based decision detector surfacing fork points without LLM calls

Atlas. | Next.js, React, TypeScript, FastAPI, Python, SQLite, TwelveLabs API, Claude API

- Built a multimodal RAG pipeline using **TwelveLabs** and **Claude Sonnet 4.6**, retrieving timestamped clips across visual/audio/transcript modalities and post-filtering about **90%** cross-video noise from raw search results
- Pre-generated all 4 study content types via parallel background jobs during video indexing and cached results to SQLite, eliminating Claude API latency on first user load
- Shipped a study suite with auto-generated notes, Quizlet flashcards, and PDF-downloadable practice problems

TECHNICAL SKILLS

Languages: Python, SQL, Java, R, Stata, JavaScript/TypeScript, HTML/CSS

Libraries & Frameworks: Pandas, Seaborn, Matplotlib, Scikit-Learn, statsmodels, SciPy, PyTorch, React, Next.js, Tailwind CSS, FastAPI, Streamlit, QGIS, SQLite

Tools & Platforms: Git/Github, Databricks, Anaconda, Mamba, Supabase, Vercel, Netlify, TwelveLabs
